

Quarterly Portfolio Strategy and Performance Memo

Beacon Wealth Partners • Q2 2026

QUARTERLY PORTFOLIO REVIEW AND STRATEGY MEMO

Client Name: The Harrison Family Trust

Lead Advisor: Julian Sterling, CFA

Reporting Period: Q2 Ended June 30, 2026

Total Assets Under Management (AUM): \$14,850,220

Performance Overview:

For the second quarter of 2026, the consolidated portfolio generated a gross return of 4.12% (3.95% net of advisory fees), outperforming the blended benchmark (60% MSCI ACWI / 40% Bloomberg US Aggregate Bond Index) which returned 3.65%. Year-to-date (YTD), the portfolio is up 7.85% net of fees, driven primarily by our tactical overweight in domestic large-cap technology equities and strategic allocations to senior secured private credit.

Asset Allocation Summary:

- Global Equities: \$8,613,127 (58.0%)
- Fixed Income: \$3,564,052 (24.0%)
- Alternative Investments (Private Equity/Real Estate): \$2,227,533 (15.0%)
- Cash & Equivalents: \$445,508 (3.0%)

Portfolio Adjustments & Recommendations:

The recent steepening of the yield curve presents an opportunity to lock in higher durations on the fixed income side. We recommend rebalancing \$400,000 from the short-term treasury fund into investment-grade corporate bonds with maturities in the 7-10 year range.

Additionally, within the Alternative Investments sleeve, the capital call for the NorthStar Real Estate Fund IV has been issued for \$150,000, due July 15. We will fund this capital call using available cash reserves, which will slightly reduce the cash drag on the portfolio.

Tax-Loss Harvesting:

We have identified approximately \$45,000 in unrealized losses within the emerging markets equity sleeve. We plan to execute a tax-loss harvesting strategy next month, swapping the current holding for a highly correlated ETF to maintain exposure while banking the loss against future capital gains.
