

Executive Summary of Valuation

Apex Valuation Services • August 2026

EXECUTIVE SUMMARY OF COMMERCIAL APPRAISAL

File Reference: AVS-2026-881

Property: The Maplewood Apartments (120-Unit Multifamily Complex)

Location: 4400 West Elm Drive, Dallas, TX 75201

Effective Date of Value: August 15, 2026

Intended User: First Pioneer Bank (Commercial Lending Division)

Valuation Methodology & Findings:

The subject property was appraised utilizing both the Income Capitalization Approach and the Sales Comparison Approach. The Cost Approach was omitted due to the age of the improvements (built in 2008), making depreciation estimates highly subjective.

1. Income Capitalization Approach:

We projected a stabilized gross annual income of \$2,450,000, assuming a market-aligned vacancy and collection loss rate of 6.0%. After deducting stabilized operating expenses of \$985,000, the Net Operating Income (NOI) is estimated at \$1,465,000. Applying a market-derived overall capitalization rate (Cap Rate) of 5.35% yields an indicated value of \$27,380,000.

2. Sales Comparison Approach:

We analyzed five recent transactions of Class-B multifamily assets within a 3-mile radius. The unadjusted sales prices ranged from \$215,000 to \$240,000 per door. After adjusting for property condition, exact location, and effective age, the reconciled value indicator was \$230,000 per unit, resulting in an indicated value of \$27,600,000.

Reconciliation and Final Value Opinion:

Primary weight is given to the Income Capitalization Approach, as it most closely mirrors the behavior of investors in this asset class.

Final "As-Is" Market Value: \$27,500,000

Exposure Time: 4 to 6 months

Marketing Time: 4 to 6 months
