

PATENT AND INVENTION ASSIGNMENT

Quantum BioTech LLC • August 2026

PATENT ASSIGNMENT AGREEMENT

This Patent Assignment Agreement (the "Assignment") is made and effective as of August 22, 2026, by and between Dr. Elias Thorne, an individual residing at 1045 Horizon Blvd, San Diego, CA 92121 ("Assignor"), and Quantum BioTech LLC, a Delaware limited liability company ("Assignee").

WHEREAS, Assignor is the true and lawful inventor of a certain invention entitled "Synthetic Peptide Delivery Mechanism for Oncology Therapeutics" (the "Invention"), for which a United States Provisional Patent Application No. 63/992,104 was filed on April 15, 2026 (the "Patent Application"); and

WHEREAS, Assignee desires to acquire the entire right, title, and interest in and to the Invention and the Patent Application, along with any subsequent patents that may issue therefrom.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignment of Rights:

Assignor hereby sells, assigns, transfers, and conveys to Assignee, its successors and assigns, the entire right, title, and interest worldwide in and to the Invention, the Patent Application, and any and all patents, continuations, continuations-in-part, divisionals, reissues, and extensions that may be granted therefor in the United States and all foreign countries.

2. Further Assurances:

Assignor agrees to execute and deliver any and all further lawful documents, oaths, declarations, and assignments, and to perform all lawful acts that Assignee may reasonably request in order to secure, maintain, and enforce the patent rights herein assigned, without further compensation but at Assignee's sole expense.

3. Warranty:

Assignor warrants that he is the sole owner of the rights herein assigned, that the rights are free and clear of any encumbrances, liens, or licenses, and that he has the full legal capacity to execute this Assignment.
