

60-Day Performance Improvement Plan

Silverline Logistics • August 18, 2026

MEMORANDUM

To: Jessica Thorne, Account Executive

From: Marcus Reed, Regional Sales Director

CC: Human Resources

Date: August 18, 2026

Subject: 60-Day Performance Improvement Plan (PIP)

The purpose of this Performance Improvement Plan (PIP) is to define serious areas of concern, reiterate Silverline Logistics' expectations, and allow you the opportunity to demonstrate improvement. This PIP will be in effect for 60 days, commencing today and concluding on October 17, 2026.

Areas of Concern:

Over the past two quarters, your performance has fallen below the baseline expectations for the Account Executive role. Specifically:

1. Client Retention: Your portfolio experienced a 15% churn rate in Q2, compared to the team average of 4%.
2. Response Times: Internal audit metrics show an average response time of 36 hours to critical client support tickets, violating our Service Level Agreement (SLA) mandate of 12 hours.
3. Pipeline Generation: You have generated \$45,000 in new pipeline over the last 90 days against a target of \$150,000.

Required Improvements and Goals:

During the next 60 days, you must achieve the following specific, measurable goals:

- Maintain a 100% client retention rate for your current top 20 accounts.
- Reduce average client response time to under 12 hours, with no tickets escalating past 24 hours without management intervention.
- Generate a minimum of \$100,000 in qualified new pipeline by the end of the PIP period.

Action Plan & Support:

We will meet weekly every Tuesday at 10:00 AM to review your progress against these goals. I will provide direct shadowing on your top 5 account check-in calls to offer immediate feedback.

Consequences:

Failure to meet and sustain these performance expectations during or after the 60-day period may result in further disciplinary action, up to and including the termination of your employment. Your signature below acknowledges that you have read and understood this document.
